CHAPTER – I

PROFILE OF BLOCKS / DISTRICTS

CHAPTER – I

The Union Territory of Andaman & Nicobar Islands popularly known as Kalapani, The Happy Islands, The Islands of Marigold Sun, The ever green island, “The Bay Islands” etc. are an archipelago of 556 emerald Islands, islets and rocks. This beautiful chain is stretched over a length of more than 700 kms, from the North to South in the Bay of Bengal. However, only 37 of these 556 Islands are inhabited. Once a hill range, extending from Burma (Myanmar) to Indonesia, these undulating Islands are covered with dense forests and endless varieties of exotic flowers and birds. The topography of the Islands is hilly and abounds in evergreen tropical forests. The sandy beaches on the edges of meandering coastlines are fringed with coconut palms that swing to the rhythm of the sea and dance to the whims of the Island.

The sea around the Islands offers excellent scope for water sports. The rare avifauna, underwater marine life and corals with crystal clear water and mangrove-lined creeks, offer a dream view of the rarest gifts of nature. These Gods Islands on the Earth can **boosts** of around 255 species of birds, around 70 species of fishes, 7 species of amphibians and a lot of forests and blue diamond seas. These Islands are the only place in this part of the world to present a unique and extremely interesting animal species like crab eating monkey, Andaman wild pig, Dugong, Salt water crocodile, Narcondam, Hornbill, Nicobaree Pigeon, Megapode and the Giant Robber Crab. The clean and wide roads, free of filth and polluted air can attract any body. Adventure tourism like trekking, Islands camping, snorkeling, SCUBA diving etc., are some of the attractions these Islands proudly offer.

The Union Territory of these Happy Islands has an area of 8,249 Sq. Kms. with three revenue districts i.e. South Andaman, North & Middle Andaman and Nicobar districts. The 10⁰ channel which is about 145 kms wide and 400 fathoms deep, separates the Andamans and Nicobars. The neighboring foreign countries are Burma in the North-East, Singapore, Malaysia and Indonesia is in the South-East.

The climate of these Islands generally remains tropical and warm tempered by pleasant sea breeze. The Islands remain exposed to both the monsoons North-Easterly gale from November to December and South Westerly gale from May to October. These Islands experience 8 to 9 months of rain. The normal annual rainfall is 3180 mm. There is no extreme cold or heat. The mean maximum temperature is 29.8⁰C. And the mean minimum temperature is 22.8⁰C. The islands are situated in mid sea hence humidity percentage is very high. The mean relative humidity is around 80.50%. Wind speed is not very high.

The population of Andaman and Nicobar Islands is 3.80 lakhs as per 2011 census out of which 2.02 lakhs are male and 1.77 lakhs are female. As per 2011 census the urban population is 1.43 lakhs and 2.37 lakhs of rural area. The density of population as per 2011 census is 46 per Sq. Km. (provisional).

There are some primitive tribes in Andaman Islands and they have been recognized as of the Negrito stock. Tribal people having characteristic akin to Mongoloid races inhabit the Islands in the Nicobar group predominantly. There are six different primitive tribes in these Islands of which two tribes Viz **JARAWAS** and **SENTINALESE** numbering about 425 and 50 respectively are still hostile. Other four tribes are Andamanese 57 Nos. Onges 112, Shompens 219 Nos. and Nicobarese are more than 27686. These figures are as per 2011 census. The Nicobarese and Shompens belong to Mongoloid Race and the other four are Negrito. Nicobarese are well developed.

The population is made up of people from all over India who came at different times. So you see a mixture of different languages, religion and culture and hence these Islands are also described as miniature India. Predominant among them are people who speak Bengali, Hindi, Tamil, Nicobari, Malayalam and Telegu. The medium of communication between them is Hindi. Literacy is 86.27% as per 2011 census.

Category	Number	% on Total population
Cultivators	16567	4.35%
Agricultural Labours	4781	1.26%
House Hold Industrial Activities	3727	0.97%
Others economic activities	127460	33.49%

Cattle, buffaloes, sheep, goat and pigs are the available livestock in these Islands. There is a good scope for goat and cattle farming in many parts of these Islands. Poultry units are being set up at a fast pace, although, still eggs are being brought from the mainland for local consumption. However the future of poultry farming seems to be very bright.

Forestry is one of the major economic activities of these Islands. A&N Islands are very rich in tropical rain forest, which cover about 90 % of its total geographical areas of these Union Territory. A large number of people were engaged in this activity directly or indirectly, but due to a recent Supreme Court order, there is a complete ban on tree felling in these Islands. The Forest Department of these Islands, which was one of the major revenue earning centers, is squeezing their activities here. Many wood based industries, which are being run mostly on small scale and tiny level producing variety of wood based products, such as, wooden furniture cane and bamboo furniture handicraft items etc are now facing trouble for getting supply of raw materials.

A large number of people of these Islands are involved in the fishing activity. This is because these Islands have 35,000 Sq. Kms. of continental shelf and 0.6 million Sq. Kms. of exclusive economic zone with an estimated potential of around 1.61 lakh tones of various fishes which includes mainly Perches, Carnax, Seer fish, Mullets Mackerel, Anchovies, Sardines, Silver Bellies, Tuna & Tuna like fishes, These fishes have very good commercial values. Sea Shells are also collected regularly out of which handicraft items are manufactured which give good commercial.

The Andaman & Nicobar Islands attract tourists from all around the globe. A good many people are engaged in running tourists resorts, hotels where they get a very good business round the year and a very high level of earning during tourists season. There are several places of tourist and historical importance in these Islands. The important among them are Cellular Jail, Ross Islands, Corbyn's Cove Beach, Anthropological Museum, Viper Island, Chatham Island, Jolly Bouy, Red Skin Island, Havelock Island, Long Island, Little Andaman and Chidiyatapu Beach etc. With the expansion of the present Airport at Port Blair, to be converted into an International Airport the prospect of tourism looms very much bright and there exists a vast scope for further development of tourism activity in these Islands. If this potential for tourism is exploited, related industries have a very good scope for development.

After the devastating Earthquake / Tsunami on 26.12.2004, the tourism industry in the islands has been affected indirectly beyond imagination. However, with the efforts of the A & N Administration and the developmental agencies, the industry has recovered and tourists both domestic as well as foreign have started coming to the islands.

The district of North & Middle Andaman came into being on **18th August.2006** after bifurcation of Andaman district into two – South Andaman and North & Middle Andaman. The two districts of Andamans are composed of the Andamans group of Islands numbering 261. The total area of the districts is 6330.40 Sq. Kms, which is about 77% of the total area of the Union Territory. The districts have at the extreme north, the Land Fall Island that is about 900 kms away from the north to the Hoogly River and about 190 Kms from Burma. The three major Islands of the district are the North Andaman Islands, the Middle Andaman Islands and the South Andaman Islands. Shallow seas separate these from each other. Further down south, at a distance of about 100 kms from Port Blair lies the Little Andaman Island. The biggest Island in the district is the Middle Andaman Island, which covers an area of about 1536 Sq. Kms.

The District of Nicobars came into being on the **1st August 1974**. It is composed of Nicobar group of Islands numbering 19 of which 7 are large and 12 are small Islands. The district lies in the South East corner of the Bay of Bengal, between 6⁰ and 10⁰ North Latitude and between 92⁰ and 94⁰ East Longitudes. Car Nicobar, which is 75 miles to the south of Little Andaman Island, is the district head quarters. The distance between Car Nicobar and the southern tip of the southernmost Islands, Great Nicobar is about 260 kms. The southern most tip of Great Nicobar i.e. Indira Point is only 150 kms from Sumatra (Indonesia) and 300 nautical miles (555 kms.) from Port Blair.

Of the 19 Islands of the district, 12 Islands namely Car Nicobar, Chowra, Teresa, Bambuka, Kamorta, Nancowrie. Trinket, Katchal, Little Nicobar, Philomilow, Kondul and Great Nicobar are inhabited. The remaining 7 Islands have no habitation. There are also a number of named and unnamed rocks. The Great Nicobar island is the largest of the group with an area of about 1045 Sq. Kms, followed by Katchal with an area of about 160 Sq. Kms. Bambuka, Trinket, Pilomilow and Kondul are small Islands. The most important island of the district is Car Nicobar. It is also the most popular island having two-thirds of the total Nicobarese population. It is also the most developed island in the district.

Indian Air Force has a surveillance unit at Car Nicobar. Military Engineering Services also have a unit there under the Command of a Garrison Engineer.

There are total 9 Blocks in Andaman & Nicobar Islands – 3 in South Andaman (Prothrapur, Ferrargunj and Little Andaman, 3 in North & Middle Andaman (Diglipur, Mayabunder and Rangat) and 3 in Nicobar district (Car Nicobar, Nancowrie and Campbell Bay).

The other particulars regarding Andaman & Nicobar Islands at a glance are as under:
